I beg your office  
will accept my apology for this  
allow your line got mislaid among  
other papers I was over looked I regret  
such a mistake very much

I will say that I have only been in  
the nursery business in a small way  
depending upon my reputation for  
my home trade on the back  
of this sheet find a list of the  
varieties generally suited to mid part  
of the country.

I find the different insects and  
diseases are the greatest drawbacks  
but don't entirely hope there  
will be found some remedy that  
will controvert the soap I got caught  
in Carnocks blight remedy which he  
claimed was unto the soap and  
would kill the blight - and took  
the boxes out but only another

failure

Yours truly

F. Osborne
